

Edge Banding Machine for Woodworking

This woodworking edge banding machine applies edge banding to various wood panels. It features adjustable settings, a precision table, and a pneumatic foot pedal for hands-free operation, ensuring accurate and consistent edge application.

Overview

Professional Edge Banding Solutions

This industrial edge banding machine is engineered to provide precise, consistent edge applications for a variety of wood panels. Designed for professional furniture manufacturers and woodworking shops, it features a robust build with an integrated support arm for handling large workpieces. With adjustable settings for diverse materials and hands-free pneumatic controls, this machine prioritizes both operational efficiency and safety.

Technical Specifications

Ideal Applications

- Professional woodworking shops
- Furniture manufacturing

Operation Control

Pneumatic foot pedal

Key Features

Adjustable thickness settings, Precision fence system, Panel support arm, Hands-free operation
