

Efficient Tire Changer for Automotive Shops

This tire changer is a robust machine designed for efficient tire mounting and demounting. The pneumatic clamping system ensures a secure grip on the wheel, while the bead breaker arm effortlessly separates the tire from the rim.

Overview

Professional Tire Service Efficiency

This robust tire changer is engineered for high-performance automotive shops and tire service centers. It features a powerful motor combined with a heavy-duty frame to ensure reliable operation during mounting and demounting tasks. With intuitive controls and a pneumatic clamping system, it minimizes manual effort while maximizing throughput and safety in the workshop.

Technical Features

Design Advantages

- Ergonomic operator control panel
- Powerful motor drive
- Sturdy industrial-grade frame
- Integrated bead breaker arm

Operation

Pneumatic clamping system

Compliance and Use

Safety Standards

Operator protection • Equipment safety

Recommended Application

Automotive repair, Tire service centers, Professional shops
