

Elbow Fitting with Set Screw

This metal elbow fitting features a set screw for secure connections. It is suitable for tubing or piping in food and beverage processing equipment.

Product Overview

Precision Elbow Fitting

This high-quality elbow fitting is engineered for secure and reliable connections in industrial piping or tubing systems. Featuring a durable machined metal construction, it is designed to withstand the rigors of demanding environments such as food and beverage processing equipment. The integrated set screw ensures a tight, vibration-resistant fit, making it an essential component for maintaining system integrity.

Technical Specifications

Material Composition

Machined Metal • Corrosion-Resistant

Model Identifier

J001

Connection Type

Elbow Fitting with Set Screw

Application

Suitable Industries

Food Processing, Beverage Processing, Industrial Piping
