Product Overview

Clean and Efficient Splitting Power

This 6-ton electric log splitter offers a reliable, emissions-free alternative to gas-powered equipment, making it suitable for both indoor and outdoor use. Designed for efficiency, it features a robust hydraulic system capable of handling logs up to 10 inches in diameter and 21 inches in length. With a cycle time of just 22 seconds, this unit streamlines the firewood preparation process for residential and professional needs.
