

Electric Air Blower for Dust and Debris Removal

This blower is a versatile tool designed for various cleaning and drying tasks. It features a powerful motor that delivers high-volume air output, making it suitable for removing dust, debris, and leaves from hard-to-reach areas.

Product Overview

High-Performance Air Blower

This versatile electric air blower is engineered for efficient dust and debris removal in various professional environments. Featuring a powerful 600W motor, it delivers high-volume airflow suitable for cleaning hard-to-reach areas. The unit includes variable speed control, allowing operators to precisely adjust the blowing rate for specific tasks, while its lightweight, ergonomic design ensures comfort during extended use.

Technical Specifications

Input Power

600 W

Power Rating

Rated Voltage	220-240V
Frequency	50 Hz
No-load Speed	16000 rpm

Performance

Max Blowing Rate	4 m ³ /min
Key Features	Variable Speed, Dust Bag Included

Packaging & Compliance

Certifications

GS Approved

Packaging Type	Color Box
