

# Electric Air Compressor, 56L Tank, 200L/min

This electric air compressor has a 56L tank and a displacement of 0.17 cubic meters per minute. It delivers a maximum pressure of 8 bar.

## Product Overview

### High-Efficiency Industrial Air Compressor

This industrial-grade electric air compressor is designed for reliable performance in demanding commercial and workshop environments. Featuring a 56L tank and a displacement capacity of 200L/min, it provides consistent airflow for various pneumatic tools and machinery. The robust V-configuration piston design ensures efficient operation at a maximum pressure of 8 Bar.

## Performance Metrics

### Key Performance Indicators

**200 L/min**

Air Displacement

**8 Bar**

Max Pressure

**1.5 kW**

Power Output

**56 L**

Tank Capacity

## Technical Specifications

Power Rating	2 HP
Max Pressure (PSI)	115 PSI
Motor Speed	1050 RPM
Piston Configuration	51mm x 2

## Physical Dimensions

### Product Dimensions

Dimension	Value (cm)
Length	92
Width	37
Height	76

## Compliance & Standards

Certifications	CE, ISO 9001:2008
