

Electric Air Fryer for Countertop Cooking

This electric air fryer is designed for convenient countertop cooking. It features adjustable temperature and timer controls for preparing a variety of foods.

Product Overview

Compact Efficient Frying

This electric countertop air fryer offers a versatile solution for modern kitchens, combining efficient 1450W performance with precise manual control. Designed with a non-stick PTFE surface and a capacity between 3.1 and 4 liters, it is perfectly suited for daily household frying tasks. The inclusion of essential safety features like overheat protection and adjustable temperature settings makes it a reliable addition to any cooking space.
