

Electric Air Roaster

The electric air roaster utilizes hot air circulation for cooking various foods. It features a transparent window, timer, temperature control, and a removable basket for easy monitoring and cleaning.

Product Overview

Healthy Cooking Solution

This Electric Air Roaster is designed for efficient, oil-free cooking, making it an ideal choice for healthy food preparation. With a 3.0L capacity and powerful 1100-1300W heating, it ensures thorough roasting using a unique turning pan mechanism. The full perspective cover allows for convenient observation of the cooking process, while the non-stick, removable pot simplifies cleanup.
