

Electric Air Roaster

The electric air roaster is designed for roasting food with hot air circulation. It includes timer and temperature control settings for versatile cooking.

Product Overview

Efficient Air Roasting Technology

This electric air roaster is designed for professional and home kitchens, utilizing advanced hot air circulation to roast food evenly and thoroughly. With a 3.0L capacity and efficient power consumption, it offers a versatile solution for healthier cooking that requires minimal oil. The integrated turning pan ensures consistent results, while safety features like the automatic switch and heat-protected handle provide peace of mind during operation.
