

Electric and Steam Iron

This appliance functions as both an electric iron and a steam iron. It is designed to smooth fabrics and remove wrinkles from clothing.

Product Overview

Professional Wireless Audio System

This professional wireless microphone system is engineered for clear and reliable audio transmission, making it an ideal choice for karaoke, public speaking, live performances, and presentations. The system includes a rack-mountable receiver unit paired with four handheld microphones, ensuring versatility for group events. With individual volume controls for each channel, users can achieve precise audio mixing for a high-quality sound experience.

Technical Specifications

Signal Technology	UHF
