

Electric and Steam Iron for Clothes

This electric and steam iron is designed for household use, in the category of washing and drying machinery. It features a combined electric heating element for dry ironing and a steam function for enhanced wrinkle removal.

Overview

Professional Fabric Care

This versatile electric and steam iron is engineered for efficient garment care, combining rapid electric heating with advanced steam functionality. Designed for smooth gliding and effective wrinkle removal, it features an ergonomic handle and intuitive temperature controls. The integrated water reservoir and non-stick soleplate ensure consistent performance across various fabric types.

Technical Specifications

Key Design Features

- Non-stick soleplate
- Ergonomic handle
- Temperature control dial
- Integrated water reservoir
- Stable base unit

Primary Usage

Household Use

Ironing Modes

Dry Ironing, Steam Ironing

Product Category

Washing and drying machinery
