

Electric Angle Grinder for Cutting and Polishing

This electric angle grinder is designed for cutting, grinding, and polishing various materials. It features an ergonomic design and durable construction for efficient and long-lasting performance.

Product Overview

High-Performance Electric Angle Grinder

This professional-grade angle grinder is engineered for versatility, making it an ideal choice for sharpening, cutting, grinding, and rust removal tasks. Powered by a robust 960W motor featuring 100% high-temperature copper wiring, it ensures reliable performance under demanding conditions. The tool incorporates a dust-proof design to protect internal components, while its slim, ergonomic handle allows for comfortable, extended use in various surface preparation applications.

Technical Specifications

Power Input	960 W
No Load Speed	12000 r/min
Wheel Diameter	100 mm
Spindle Thread	M10
Power Supply Cord Length	2.8 m

Features & Construction

Key Features

- 100% high-temperature copper wire motor
- Dust-proof motor design
- Heavy-duty quality gear for long-term use
- Slim handle design for improved handling

Suitable Applications	Cutting, Grinding, Polishing, Sharpening, Rust Removal, Surface Preparation
Wire Cup Brush Capacity	75 mm
