

Electric Angle Grinder for Cutting and Polishing

This angle grinder is a power tool used for cutting, grinding, and polishing. It features a robust motor that delivers high performance and durability.

Product Overview

Professional Electric Angle Grinder

This high-performance electric angle grinder is engineered for versatile cutting, grinding, and polishing applications. Featuring a robust 1200W motor, it delivers consistent power for demanding tasks in metalworking and construction. The tool includes ergonomic design elements and an auxiliary handle to ensure operator comfort and safety during extended use.

Performance Specifications

Rated Power

1200 W
Power Input

Rotation Speed

3000-11000 RPM

Compatibility

Compatible Disc Diameters

- 100
- 115
- 125

Spindle Thread Options

M10, M14

Safety & Features

Safety Features

Spindle Lock • Protective Guard • Auxiliary Handle

Model Number

8100HC
