

Electric Angle Grinder for Material Removal

This electric angle grinder is a versatile power tool designed for grinding, cutting, and polishing various materials. It features a high-performance motor for efficient material removal and durable construction.

Product Overview

Professional Material Removal Tool

This electric angle grinder is a versatile power tool engineered for efficient grinding, cutting, and polishing tasks across various materials including metal, stone, and tile. Built with a high-performance motor, it ensures rapid material removal for demanding professional applications. The design prioritizes user safety and comfort, incorporating a protective safety guard and an ergonomic handle for extended operation.

Technical Features

Safety Equipment

- Integrated safety guard for debris protection
- Ergonomic handle design

Performance Highlights

1 Grade

High-Performance Motor

Suitable Applications

Metal Grinding, Stone Cutting, Tile Polishing, Material Removal
