

Electric Belt Sander for Woodworking

This power tool utilizes a continuous loop of sandpaper driven by an electric motor for sanding applications. It is typically used for quickly removing large amounts of material or smoothing rough surfaces.

Overview

High-Performance Belt Sander

This electric belt sander is designed for efficient material removal and surface smoothing in woodworking applications. Engineered for professional use, it features a powerful 1200W motor and a high belt speed to handle demanding tasks with ease. The unit includes practical design elements such as an ergonomic handle for operator comfort, adjustable belt tension for precision, and a built-in dust collection port to maintain a cleaner workspace.
