

Electric Bicycle and Component Set

This set includes components needed to convert a bicycle to electric power. It provides an option to upgrade existing bikes with electric assistance.

Overview

High-Performance Water Transfer Solution

This self-priming centrifugal water pump is engineered for efficient water transfer across diverse applications, including irrigation, construction site drainage, and emergency water removal. Designed for independent operation via a reliable gasoline engine, it offers consistent performance in demanding environments. The unit features a robust protective frame that ensures both durability during operation and ease of portability for field use.

Technical Specifications

Pump Type	Self-priming centrifugal
Power Source	Gasoline Engine
Model Designation	30T

Features

Design Advantages

- Durable protective frame
- Portable design
- Independent gasoline-powered operation
- Efficient water flow engineering

Suitable Applications	Irrigation, Construction, Emergency Water Removal
