

Electric Bicycle Battery Pack

This high-capacity battery pack is designed for electric bicycles. It features a durable aluminum casing, integrated charging ports, a handle for easy carrying, and a power indicator display.

Overview

High-Performance E-Bike Power

This high-capacity battery pack is engineered specifically for electric bicycles, offering a robust and reliable power source for various riding conditions. Constructed with a durable aluminum casing, it ensures longevity and protects internal components from impacts. The unit includes integrated charging ports and a convenient handle for easy transport, while the built-in power indicator display allows riders to monitor battery status at a glance.
