

Electric Bicycle Brushless Motor Controller

This universal controller is designed for electric bicycles. It has a power output of 350W and operates within a voltage range of 24-48V, with a current of 16A.

Overview

RKM06 Series Controller

The RKM06 series is a versatile, universal brushless motor controller engineered specifically for electric bicycle applications. Designed for reliability and performance, this unit supports a wide voltage range of 24V to 48V and delivers a robust 350W of power. It is an essential component for maintaining efficient motor operation in various e-bike configurations.

Technical Specifications

Rated Power

350 W

Power Output

Controller Type

Brushless • Universal

Operating Voltage

24V - 48V

Rated Current

16 A
