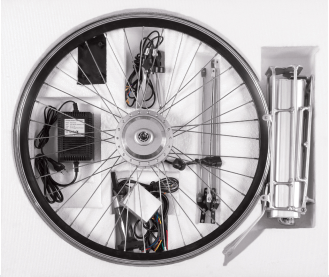
Electric Bicycle Conversion Kit

This electric bicycle conversion kit converts a standard bicycle into an electric bike. The kit includes a hub motor wheel, battery pack, charger, controller, and wiring.



Overview

Convert Your Bicycle to Electric

This electric bicycle conversion kit provides an efficient and convenient solution for transforming a standard bicycle into a motorized electric bike. The comprehensive set includes a high-performance hub motor wheel, a reliable lithium-ion battery pack with a mounting rack, a smart controller, and all necessary wiring for installation. Designed for versatility, this kit offers motorized assistance to enhance cycling performance and ease of travel.

Power System

Input Voltage	240 V
Charger Output	42V DC 1.5A
Input Frequency	60 Hz
Charger Model	DT-360150

Certifications

Compliance Standards	CE, RoHS

Kit Components

Package Contents

- Wheel with integrated hub motor
- Lithium-ion battery pack
- Mounting rack
- Battery charger
- Motor controller
- Wiring harness
