

Electric Bicycle with Mid-Drive Motor and Lithium Battery

This electric bicycle is equipped with a mid-drive motor and a lithium battery. It provides efficient power and extended riding range for urban commuting and leisure.

Product Overview

High-Performance Electric Commuter

This electric bicycle features a robust mid-drive motor paired with a reliable 36V lithium battery, designed to provide efficient and balanced performance for daily commuting. With a 26-inch wheel diameter and an aluminum frame, it offers a lightweight yet durable riding experience. The inclusion of a Shimano drivetrain ensures smooth gear transitions, while the 70km+ range makes it an ideal choice for urban transportation.
