

Electric Bike Battery Charger with Digital Display

This industrial battery charger is designed for electric bike applications. It features multiple voltage and current meters for monitoring charging status, housed in a robust metal enclosure with ventilation.

Product Overview

Industrial-Grade Charging Solution

This high-performance battery charger is specifically engineered for electric bike applications, providing reliable and efficient power delivery. Housed in a robust metal enclosure with integrated ventilation, it is built to withstand demanding operational environments. The unit features an intuitive digital display alongside multiple voltage and current meters, allowing for precise monitoring and control of the charging process.

Technical Specifications

Monitoring Features

- Digital display
- Voltage meter
- Current meter
- Operational state indicator lights

Housing Material	Robust metal enclosure
Cooling System	Integrated ventilation
Primary Application	Electric Bike, Industrial Use
