

Electric Bike Lithium-Ion Battery Pack

This high-capacity lithium-ion battery pack is designed for electric bicycles. It features a durable aluminum alloy casing for protection and heat dissipation.

Product Overview

High-Performance E-Bike Power Solution

This high-capacity lithium-ion battery pack is engineered specifically for electric bicycles, offering reliable power and consistent performance. Housed in a durable aluminum alloy casing, it provides excellent protection and effective heat dissipation during operation. An integrated Battery Management System (BMS) continuously monitors voltage, current, and temperature to ensure safe and efficient energy delivery, while the user-friendly design allows for easy installation and removal.

Technical Specifications

Casing Material	Aluminum Alloy
Battery Chemistry	Lithium-Ion

Features

Interface

- LED Battery Level Indicator
- Charging Status LED
- Dedicated Charging Port
- Dedicated Discharge Port

Safety & Management	Integrated BMS, Voltage Monitoring, Current Monitoring, Temperature Monitoring, Heat Dissipation
---------------------	--

Compatibility

Installation	Frame-mounted, quick release
--------------	------------------------------
