

Electric Bike Parts

These are replacement and upgrade components for electric bikes. They include a variety of parts needed for maintenance and repair.

Product Overview

High-Performance Electric Bike Components

These electric bike parts are engineered to provide reliable performance and seamless integration for modern e-bike builds. Designed with durability and efficiency in mind, these components ensure a smooth ride and consistent power delivery for various cycling applications. Ideal for assembly and maintenance, this kit offers the essential hardware needed to optimize electric bicycle functionality.

Compatibility

Compatible Systems

E-Bike, Pedelec, Electric Scooter

Technical Specifications

Included Components

- Motor Controller
- Throttle Assembly
- Brake Cut-off Sensor
- Wiring Harness

Rated Current

20 A

Max Current

Rated Voltage

48 V

Compliance

Quality Standards

CE • RoHS
