

Electric Burr Coffee Grinder with Fineness Selector

This electric burr coffee grinder is designed with a stainless steel housing and a translucent coffee bean container. It features a fineness selector with 30 positions, ranging from fine to coarse.

Overview

Precision Coffee Grinding

This electric burr coffee grinder is engineered for consistent and uniform grinding, which is essential for achieving optimal coffee extraction. Designed for both home and professional settings, it features a durable construction using stainless steel and high-quality plastic components. Its stepless grind adjustment system allows users to dial in the perfect coarseness for any brewing method, ranging from fine espresso to coarse French press.
