

Electric Cable Hoist with Remote Control

This electric hoist is a versatile lifting device designed for various applications. It features a robust motor for reliable performance and a durable cable for secure lifting.

Overview

Professional Lifting Solution

This electric cable hoist is a versatile and robust lifting device engineered for demanding industrial environments, including workshops and construction sites. Equipped with a powerful motor and durable steel cable, it ensures reliable performance and secure handling of heavy loads. The integrated remote control system allows for precise operation and enhanced operator safety during lifting tasks.

Technical Specifications

Model Identifier	A600
Control System	Remote Control

Features

Key Benefits

- Robust motor for reliable performance
- Durable cable for secure lifting
- Remote control for easy operation
- Integrated safety features
- Easy installation and maintenance

Suitable Applications	Workshops, Construction Sites, Industrial Settings
