

Electric Car Polisher Buffer

The electric car polisher buffer is designed for polishing and buffing vehicle surfaces. It features a rotating head, ergonomic handle, and variable speed control for removing imperfections and maintaining a glossy finish on cars and trucks.

Product Overview

Professional Vehicle Detailing Tool

This high-performance electric car polisher buffer is engineered to restore and maintain the pristine appearance of vehicle surfaces. Equipped with a variable speed control and an ergonomic handle, it provides the precision required to effectively remove scratches, swirl marks, and oxidation. It is an essential power tool for achieving a professional-grade, glossy finish on cars, trucks, and various other automotive surfaces.

Technical Specifications

Action Type	Rotary
Speed Control	Variable

Key Features

Key Benefits

- Removes deep scratches and swirl marks
- Eliminates surface oxidation
- Ergonomic handle for user comfort
- Adjustable intensity for diverse paint conditions

Applicable Surfaces	Cars, Trucks, Automotive Body Panels
