Product Overview

Professional Car Polishing Solution

This electric car polishing tool is engineered for high-efficiency automotive detailing and paint correction. Featuring a robust dual-handle design, it offers superior control and comfort for removing scratches, swirl marks, and oxidation. With its direct-drive system, the tool ensures low noise and minimal vibration, making it a reliable choice for restoring a glossy finish to vehicle surfaces.

Technical Specifications

Rated Voltage	230 V
Power Consumption	90 W

Performance

Key Features

- Big torque and high efficiency
- Ergonomic dual-handle design
- Direct drive mechanism
- Low noise and reduced vibration
- High-impact ABS shell

No-Load Speed	3500 RPM
