

Electric Carbonated Drink Dispenser

This electric dispenser provides carbonated beverages with high cooling performance. It features an easily installed water tank with temperature detection and utilizes food-grade stainless steel pipes.

Product Overview

Professional Carbonated Drink Dispenser

This electric carbonated drink dispenser is engineered for high-performance commercial environments such as restaurants, cafes, and bars. It features an advanced cooling system and energy-efficient electric pump control to ensure consistent beverage quality. Designed with food safety in mind, the unit utilizes 304 stainless steel piping and includes an intuitive digital display for automatic temperature monitoring.

Key Features

Key Features

Energy Efficient, Food Grade Materials, Easy Installation, Automated Monitoring
