

Electric Cargo Tricycle for Goods Transport

This electric tricycle is designed for transporting goods in urban and industrial environments. It features a cargo bed enclosed by metal railings.

Overview

Efficient Urban Cargo Solution

This electric cargo tricycle is designed for reliable goods transport in urban and industrial settings. Featuring a robust scooter-style front configuration and a spacious rear cargo bed, it offers an environmentally friendly alternative to traditional delivery vehicles. The tricycle provides a stable and maneuverable solution for last-mile logistics and small-scale cargo handling.
