

Electric Cargo Tricycle for Goods Transportation

This electric tricycle is designed for transporting cargo. It features a sturdy frame, a large cargo bed, and an electric motor.

Overview

Versatile Electric Cargo Solution

This electric cargo tricycle is engineered specifically for efficient goods transportation. With a sturdy frame and a spacious cargo bed, it provides a reliable solution for delivery services, agricultural tasks, and general hauling needs. The electric motor ensures smooth propulsion, making it an ideal choice for businesses looking to optimize their short-haul logistics.
