

Electric Cargo Tricycle for Heavy Loads

This heavy-duty electric cargo tricycle is designed for efficient and reliable transportation of goods. Featuring a robust frame, a spacious cargo bed, and a powerful electric motor, it is suitable for various commercial and industrial applications.

Overview

Heavy-Duty Electric Cargo Solution

This heavy-duty electric cargo tricycle is engineered for the efficient and reliable transportation of goods in both urban and rural settings. Designed with a robust frame and a spacious cargo bed, it provides the stability and capacity required for demanding commercial and industrial applications. The vehicle features a fully enclosed cabin for driver protection and an electric powertrain that ensures low emissions and quiet, sustainable operation.

Performance & Safety

Operational Benefits

- Low emissions
- Quiet operation
- Enhanced traction
- Driver protection

Powertrain	Electric
Safety Features	Enclosed Cabin, Efficient Braking System, Durable Tires

Technical Specifications

Model Number	FS2500DZH-2A
