Overview

Sustainable Urban Logistics

This electric cargo tricycle is engineered specifically for efficient, eco-friendly urban delivery and transportation. Featuring a robust chassis and a fully enclosed, temperature-controlled cargo box, it offers a secure solution for last-mile logistics. Its compact design ensures excellent maneuverability in congested city environments, while the electric powertrain provides quiet, emission-free operation.

Refrigeration System

Cargo Box Specifications

- Integrated foam polyurethane insulation
- Built-in high performance compressor
- Air cooling circulation system

Minimum Temperature

-18 °C

Lowest Temperature

Vehicle Design

Key Features

Electric Powertrain, Fully Enclosed Cabin, Zero-Emission, Weather-Protected, Urban Optimized
