

Electric Cargo Tricycle with Cargo Bed

This electric cargo tricycle is designed for transporting goods and materials. It features a sturdy frame, a large cargo bed with railing, and an electric motor for efficient and emission-free operation.

Product Overview

Reliable Electric Cargo Solution

This electric cargo tricycle is engineered for efficient, emission-free transport of goods and materials in urban and agricultural environments. Built with a sturdy three-wheeled frame for enhanced stability, it features a spacious metal cargo bed with protective railing. Designed for practical utility, the tricycle includes essential safety features like a front headlight and rearview mirrors, making it a dependable choice for last-mile delivery and farm operations.
