

Electric Cargo Tricycle with Cargo Bed

This electric cargo tricycle is designed for efficient and convenient transportation of goods. It features a robust frame, a spacious cargo bed with railing, and an electric motor for assisted propulsion.

Overview

Efficient Cargo Transportation

This electric cargo tricycle is engineered for the efficient and convenient transportation of goods in urban environments. Featuring a robust frame and a spacious cargo bed equipped with protective railing, it provides a stable platform for various delivery needs. The integrated electric motor offers assisted propulsion, reducing rider fatigue and increasing productivity, while the durable tire construction ensures reliable performance for daily operations.

Design & Features

Key Features	Electric Assisted, Cargo Bed, Front Basket, Robust Frame
Primary Use	Urban Deliveries and Personal Transport

Performance

Propulsion	Electric Motor Assisted
