

# Electric Cargo Tricycle with Enclosed Cabin

This electric cargo tricycle is a versatile and eco-friendly solution for urban deliveries and commercial use. The three-wheeled vehicle features a fully enclosed cabin, providing weather protection for both the driver and the cargo.

## ADDITIONAL IMAGES

## Overview

### Eco-Friendly Urban Logistics Solution

This electric cargo tricycle offers a versatile, emission-free transportation solution specifically engineered for urban delivery services and commercial applications. Featuring a fully enclosed cabin, it provides essential weather protection for both the driver and the transported goods, ensuring operational reliability in various conditions. Its compact, three-wheeled design allows for exceptional maneuverability in dense city environments, helping businesses improve delivery efficiency while significantly reducing their carbon footprint.

## Performance & Safety

### Key Operational Metrics

**3 wheels**

Wheel Count

Drive System

Electric Motor

Safety Features

Enclosed Cabin, Efficient Braking System, Integrated Lighting

## Design & Utility

### Ideal Applications

- Urban delivery services
- Last-mile logistics
- Commercial goods transport

Cargo Configuration

Fully enclosed cargo box
