

Electric Cargo Tricycle with Front Basket and Rear Cargo Area

This electric cargo tricycle is designed for efficient transportation of goods. It features a front basket for smaller items and a large rear cargo area with protective railings.

Overview

Efficient Urban Cargo Solution

This electric cargo tricycle is engineered for reliable and efficient goods transportation in urban environments. Featuring a versatile design with both a front basket for smaller items and a spacious rear cargo area equipped with protective railings, it ensures secure handling of various loads. The electric motor provides a clean, quiet, and sustainable operation, making it an ideal choice for last-mile delivery services and personal utility transport.
