

Electric Cargo Tricycle with Passenger Seat

This electric cargo tricycle is designed for hauling goods and passengers. It features a front basket, a rear cargo bed with a seat, and a step-through frame for easy access.

Overview

Versatile Electric Cargo Tricycle

This electric cargo tricycle offers a practical and efficient solution for both goods transportation and passenger commuting. Designed with a stable three-wheel configuration and a convenient step-through frame, it ensures ease of use and safety for operators. The integrated electric motor and battery system provide a quiet, eco-friendly alternative to traditional transport methods.
