

Electric Cargo Tricycle with Rear Cargo Bed

This electric tricycle is designed for carrying goods or passengers. It features a cargo bed at the rear and a scooter-style front end.

Product Overview

Professional Electric Cargo Tricycle

This robust electric tricycle is designed for efficient urban logistics and goods transportation. Featuring a stable three-wheeled configuration and a spacious rear cargo bed, it provides a reliable solution for last-mile delivery services. The scooter-style front end ensures maneuverability, while the integrated electric powertrain offers a sustainable and cost-effective alternative for daily business operations.
