Overview

Professional Urban Logistics Solution

This pure electric cargo van is engineered for high-efficiency urban delivery, offering a balance of performance and sustainable operation. It features a robust powertrain with a permanent magnet synchronous motor, ensuring reliable acceleration and significant climbing capability under full load. Designed with a focus on safety and low power consumption, this vehicle provides an ideal platform for last-mile logistics and commercial transportation.

Key Highlights

Zero Emissions, High Reliability, High Load Capacity, Urban Optimized

Performance

Performance Metrics

90 km/h

Max Speed

5.5 s

0-50km/h Acceleration

30 %

Max Climbing Grade

Driving Range

300 km

Technical Specs

Weight Specifications

Metric	Value
Curb Weight (kg)	2300
Gross Vehicle Weight (kg)	4495

Vehicle Dimensions

- Wheelbase: 3300mm
- Front Overhang: 1100mm
- Rear Overhang: 1400mm

Powertrain

Electric Powertrain

Attribute	Specification
Peak Power	100 kW
Rated Power	50 kW
Energy Capacity	46 kWh
