Overview

Efficient Electric Cargo Transport

This pure electric cargo van is designed for versatile urban transport and commercial logistics. With a substantial cargo volume of 4.7 cubic meters, it provides ample space for goods while maintaining a compact footprint. Engineered for sustainability, it offers an impressive range of over 230km under comprehensive road conditions, making it an ideal partner for daily business operations.

Performance

Cargo Volume	4.7 m ³
Comprehensive Range	230 km
Range at 60km/h	283 km
Gross Vehicle Weight	2570 kg

Technical Specs

Powertrain

Pure Electric • Front-Wheel Drive

Key Features

- Regenerative braking system
- High-capacity battery
- Modern infotainment system
- Integrated fog lights
