

Electric Circular Saw

This electric circular saw is equipped with a high-speed motor for efficient cutting. It is designed for woodworking and construction applications, providing precise and powerful cutting performance.

Product Overview

Professional Performance

This electric circular saw is engineered for high-efficiency cutting in demanding woodworking and construction environments. Featuring a high-speed motor and a durable blade guard, it delivers both power and safety for precise operations. The inclusion of an adjustable cutting depth and a sturdy base plate ensures stability and accuracy for every cut.

Technical Specifications

Key Features

- High-speed motor
- Adjustable cutting depth
- Durable blade guard
- Sturdy base plate

Performance Highlights

1 High

Cutting Precision

1 High

Motor Speed

Suitable Applications

Woodworking, Construction
