

Electric Citrus Juice Extractor with Rotating Reamer

This electric citrus juicer features a rotating reamer for efficient juice extraction from various citrus fruits. It includes a detachable bowl with a built-in strainer to separate pulp and seeds from the juice.

Product Overview

Efficient Citrus Extraction

This electric citrus juice extractor is designed for quick and efficient juice preparation in any kitchen environment. Featuring a two-direction rotating reamer, it maximizes juice yield from various citrus fruits while the integrated pulp control filter ensures a smooth consistency. The unit includes a detachable transparent container and a convenient power cord storage design for easy cleanup and organization.
