

# Electric Coffee Grinder with Stainless Steel Blade

This electric coffee grinder features a high-quality plastic housing and a stainless steel grinding blade. It has a 60g capacity, a safety lock system, and a large start button for easy operation.

## Product Overview

### Compact Grinding Solution

This electric coffee grinder offers a reliable and efficient way to process coffee beans for various brewing methods. Featuring a durable stainless steel blade and a robust 150W motor, it ensures consistent performance in a compact form factor. The intuitive design includes a safety lock system and pulse operating mode to provide users with precise control over the grinding consistency.

## Technical Specifications

### Power Output

**150 W**

Power Consumption

### Supported Voltages

- 220-240V, 50/60Hz
- 120V, 60Hz

### Grinding Capacity

60 g

## Features & Operation

### Safety Features

Safety Lock System

### Operating Modes

Pulse Mode, Manual Start

## Design & Materials

### Housing Material

High quality plastic

### Blade Material

Stainless steel
