

Electric Coffee Percolator

This electric coffee percolator features a stainless steel body and a black plastic base and handle. It is designed for brewing coffee using the percolation method, offering a traditional coffee-making experience.

Product Overview

Classic Brewing Excellence

This electric coffee percolator is designed for those who appreciate the traditional percolation brewing method. Featuring a durable polished stainless steel body, it combines a classic aesthetic with modern convenience. With a generous 14-cup capacity and an integrated keep-warm function, it is an ideal solution for offices, events, or large households.
