Product Overview

High-Efficiency Electric Combi Boiler

This wall-mounted electric combi boiler provides a comprehensive solution for both residential heating and domestic hot water supply. Engineered for reliability, it features a rigid casing for protection, built-in pump, and advanced control systems including anti-freeze and heat preservation modes. With a compact design and intelligent scheduling, it offers an efficient alternative to traditional gas systems for modern installations.

Key Features

Core Functionalities

Dual Heating System, Anti-Freeze Mode, Heat Preservation Mode, Integrated Pump, Schedule Selection System, Digital Control Panel

Technical Specifications

Performance Metrics

99 % Efficiency	5 L Expansion Tank Capacity	21 kg Net Weight
---------------------------	---------------------------------------	----------------------------

Operating Temperatures

- Radiator Mode: 35-80°C (Default: 65°C)
- Floor Heating Mode: 35-55°C (Default: 50°C)
- Domestic Hot Water (DHW): 35-60°C (Default: 38°C)
- Anti-freeze Start: <7°C
- Anti-freeze Stop: e10°C

Dimensions

602mm x 380mm x 195mm

Connections

G3/4" (Radiator/Floor Heating), G1/2" (DHW)

Model Comparison

Model Specifications

Model	Power (kW)	Voltage
Combi Solo 6	6	230V/400V
Combi Solo 9	9	230V/400V
Combi Solo 12	12	230V/400V
Combi Duo 15	15	400V
Combi Duo 18	18	400V
Combi Duo 21	21	400V
Combi Duo 24	24	400V
