

Electric Commuter Bike with Basket and Rear Seat

This electric bike is designed for commuting and leisure. It features a step-through frame, front basket, rear passenger seat with backrest, hub motor, and full suspension.

Overview

Urban Commuting Redefined

This electric commuter bike is designed for efficiency and comfort in urban environments. Featuring a step-through frame, it ensures easy mounting and dismounting for riders of all sizes. The inclusion of a front basket and a rear passenger seat with a backrest makes it a versatile solution for both daily commuting and leisure riding.
