Overview

Urban Commuting Solution

This electric commuter motorcycle is engineered for efficient urban travel, combining a powerful 1500W motor with a reliable 60V lithium battery system. Designed for stability and comfort, it features a robust steel and PVC frame, disc braking for safety, and a practical 55km range. It is an ideal choice for short-distance transportation needs, offering a balance of performance, durability, and ease of use.

Performance

Motor Power	1500 W
Maximum Speed	45 km/h
Range per Charge	55 km

Battery & Charging

Battery Specifications

60 V
Voltage

20 AH
Capacity

Charging Time	4-6 hours
