

Electric Commuter Scooter

This electric scooter is designed for urban commuting and recreational use. It features a powerful electric motor and long-lasting battery for efficient and reliable transportation.

Overview

High-Performance Urban Mobility

This electric commuter scooter is engineered for efficient, quiet, and sustainable urban travel. Featuring a robust brushless DC motor and a high-capacity battery, it offers a reliable range and consistent performance for daily commuting needs. With its sleek, modern design and ergonomic seating, it combines comfort with durability for a superior riding experience.

Performance

Maximum Speed

45 km/h
Lithium Version

25 km/h
Silicon Version

Range per Charge

72 km
Lithium Battery

50 km
Silicon Battery

Maximum Load Capacity

150 kg

Technical Specifications

Battery Details

| Feature | Value |
|---------------|--------------------|
| Battery Type | LiFePo4 |
| Capacity | 70V 50000W |
| Cycle Life | Approx. 800 cycles |
| Charging Time | 7-9 hours |

| | |
|------------|-------------------------------------|
| Motor Type | Brushless DC motor |
| Dimensions | 2220mm (L) x 780mm (W) x 1210mm (H) |
| Wheelbase | 1580 mm |
| Net Weight | 142 kg |

Components

| | |
|----------------|-----------------------------------|
| Braking System | Front Disk Brake, Rear Drum Brake |
| Tire Size | 130/60-13 (Front and Rear) |

Electrical

| | |
|----------------|----------------------------|
| Charger Input | AC 230V or 110V (optional) |
| Charger Output | 88.7V/5A |
