

# Electric Commuter Scooter with Maple Deck

This electric scooter has an 8-inch wheelset and a 350W motor. It also features a 36V LG 10.5AH lithium battery, along with a front and rear suspension system and a Canadian maple deck.

## ADDITIONAL IMAGES

## Overview

### Premium Urban Commuter

This electric commuter scooter combines modern urban mobility with a unique aesthetic, featuring a distinct maple deck that offers both style and stability. Designed for efficiency and comfort, it includes an adjustable handlebar to accommodate riders of various heights, alongside a robust braking system and durable tires for a safe, smooth ride. Its compact, foldable design makes it an ideal solution for daily commuting and recreational use in city environments.
