

Electric Corded Grass Trimmer

The electric grass trimmer is a lightweight and powerful tool for trimming grass and weeds. It features an adjustable telescopic shaft and a rotating head for comfortable and precise operation.

Product Overview

Efficient Garden Maintenance

This electric corded grass trimmer is designed for effective maintenance of gardens and lawns. It features a powerful motor that ensures consistent cutting performance without the downtime associated with battery charging. The lightweight construction and adjustable telescopic shaft allow for comfortable operation, while the rotatable head enables precise edging along borders and sidewalks.

Technical Specifications
